

# Migrate Your Windows Applications to AWS and Claim Exclusive Offer

[Claim your offer](#)

## Only Need 6 Hours to Migrate

More organizations are moving to the cloud to host their mission-critical Windows applications. Amazon Web Services (AWS) provides customers increased agility, reduced costs, and improved time-to-market while enabling organizations to deliver superior value to their end customers. AWS supports everything you need to build and run Windows applications including Active Directory, .NET, Microsoft SQL Server, Windows desktop-as-a-service, and all supported versions of Windows Server. With our proven expertise, we can help you easily lift-and-shift, refactor, or even modernize your Windows workloads in just as short as 6 hours.

## Benefits of running your Windows applications on AWS

### More migration experience

AWS has years of experience helping thousands of organizations migrate mission-critical Windows applications to the cloud

### Increased security

AWS has a breadth of security solutions that meet regulatory and compliance requirements

### Greater reliability and faster performance

With globally distributed Availability Zones and Regions, AWS has the most extensive and reliable infrastructure for running Windows applications

### Lower costs

AWS provides unique pricing models that help effectively manage costs while maintaining the optimal performance capacity Windows applications need

### Efficient AWS services for Windows

AWS offers a broad set of services with deep functionality to drive efficiencies across Windows applications

## Windows workloads on AWS

With over a decade of experience and client satisfaction, AWS is the ideal cloud to run Windows workloads. Mastersystem Infotama and AWS helps support everything you need to migrate and modernize Windows-based applications on the cloud. By using AWS and our solution you can quickly gain broader and deeper functionality to run your Microsoft workloads.

## Why choose Mastersystem to run Windows applications on AWS
